ESP BOOM TOTAL RATED LOADS CHART

- The total rated loads shown are for the case where the outriggers are set horizontally on firm level ground. The values above the bold lines are based on the crane strength while those below are based on the crane stability.
- The table below shows the classification of Performances A to N of the total rated load.

Counterweight Outrigger extension width	105 t	92 t	72 t	52 t	30 t	0 t
8.7 m	A	B	C	E	G	K
8.0 m		B	C	E	I	L
6.8 m			D	F	I	L
5.7 m				H	J	L
2.7 m						M、N

Even for the same classification of Performance/boom length, the total rated load varies depending on the boom extending condition.

Performances M and N are available for the 22.4 m boom or shorter booms. The working range is as shown in the drawing on the right.

- The weights of the slings and hooks (180t hook with attachment: 2,200kg, 180t hook: 2,100kg, 80t hook: 1,360kg, 12.5t hook: 490kg) are included in the total rated loads shown.
- The total rated load is based on the actual working radius including the deflection of the boom.
- The standard hook and number of part lines are shown at the bottom of the total rated loads chart. When using with other than this number of part lines, the load per line should not exceed 123 kN {12.5 tf} for the main winch and the auxiliary winch.
A number of part lines are one (12.5t hook is used) when the single top is used.
- The total rated load for the single top is the value obtained by subjecting the weight of the hook and the sling mounted on the boom from the total rated load of the boom, and must not exceed 12.5 t.
- The rated total load table does not include wind effects. When the maximum instantaneous velocity is 10m/s or more, stop crane operation.
- Mark in the total rated load chart shows the boom elevating angle range under no load.

FULLY AUTOMATIC LUFFING JIB TOTAL RATED LOADS
--

- The total rated loads shown are for the case where the outriggers are set horizontally on firm level ground. The values above the bold lines are based on the crane strength while those below are based on the crane stability.
- The table below shows the classification of Performances FA to FK of the total rated load.

Counterweight Outrigger extension width	105 t	92 t	72 t	52 t	30 t	0
8.7 m	F A	F B	F C	F E	F G	F K
8.0 m	/	F B	F C	F E	F I	/
6.8 m	/	/	F D	F F	F I	/

- The following table shows the extending condition of each boom stage at the boom length that is shown in the total rated loads chart.

Boom length	Boom stage telescoping condition (%)

47.9 m	92	92	92	92	0
60.0 m	100	100	100	100	100

- The total rated load is limited to 26.0 t when the B pin (boom fixing pin) is not inserted.
- The weights of the slings and hooks (80t hook: 1,360kg, 25t hook: 1,140kg, 12.5t hook: 490kg) are included in the total rated loads shown.
- The total rated load is based on the actual working radius including the deflection of the boom.
- The standard hook and number of part lines are shown in the total rated loads chart. The load per line should not exceed 123 kN (12.5 tf).
- The rated total load table does not include wind effects. When the maximum instantaneous velocity is 10m/s or more, stop crane operation.
- Mark in the total rated load chart shows the boom elevating angle range under no load.

LUFFING JIB TOTAL RATED LOADS

- The total rated loads shown are for the case where the outriggers are set horizontally on firm level ground. The values above the bold lines are based on the crane strength while those below are based on the crane stability.
- The table below shows the classification of Performances LA to LG of the total rated load.

Counterweight Outrigger extension width	105 t	92 t	72 t	52 t	30 t
8.7 m	L A	L B	L C	L E	L G
8.0 m	/	L B	L C	L E	/
6.8 m	/	/	L D	/	/

- The following table shows the extending condition of each boom stage at the boom length that is shown in the total rated loads chart.

Boom length	Boom stage telescoping condition (%)				
	2nd boom	3rd boom	4th boom	5th boom	6th boom
13.9 m	0	0	0	0	0

- The weights of the slings and hooks (180t hook: 2,100kg, 80t hook: 1,360kg, 25t hook: 1,140kg, 12.5t hook: 490kg) are included in the total rated loads shown.
- The total rated load is based on the actual working radius including the deflection of the boom.
- The standard hook and number of part lines are shown in the total rated loads chart. The load per line should not exceed 123 kN {12.5 tf}.
- The rated total load table does not include wind effects. When the maximum instantaneous velocity is 10m/s or more, stop crane operation.
- Mark in the total rated load chart shows the boom elevating angle range under no load.
