31'	Reduce load 850 lb
45'	Reduce load 600 lb
60'	Reduce load 450 lb
75'	Reduce load 350 lb
90'	Reduce load 300 lb

\* See owners manual. Also the 60,000 lb load requires optional 9/16" diameter 6x25 IWRC cable.

#### Note:

- All capacities are in pounds, angles in degrees, radius in feet.
- Loaded boom angles are given as reference only.
- Shaded areas are structurally limited capacities.
- Handling of personnel is only permitted with full extension of all outrigger beams.

#### SET-UP

- Fully extend and set outriggers to full-span location, level crane and set front stabilizer if equipped.

#### OPERATION

- The 31 ft. boom length capacities are based on boom fully retracted. If not fully retracted, do not exceed 45 ft. boom length capacities.
- Do not extend unloaded boom or jib beyond stability limit line on range chart as loss of stability may occur.
- Load blocks and slings are considered to be a part of the load.
- Operate with jib by radius when main boom is fully extended and by boom angle when main boom is partially extended. Do not exceed jib capacities at any partially extended boom length.
- All jib loads must be lifted with single part reeving.
